

Carbon Epoxy Sail Battens from CST

CST Composites' new range of carbon fibre epoxy sail battens are extremely light, tough, strong and reliable making them ideal for all types of skiff mainsails.

Quality

CST battens are made via an automated pultrusion process, which gives extremely accurate control of resin and fibre content ensuring that every batten is of the highest quality and has consistent bend characteristics. CST battens are precision ground by CNC machinery to your specification before being hand finished ready to fit the sail.

Performance

CST battens are made from carbon fibre and epoxy resin. CST carbon battens can be up to 60% lighter than a glass rectangular batten, which can save over 1kg of weight out of your mainsail! By using epoxy resin we ensure the highest level of toughness and reliability, reducing the likelihood of breakage both on and off the race course.

Price / Availability

CST carbon sail battens are currently available through all good sailmakers. It is also possible to buy directly from CST. You will find our prices extremely competitive compared to other suppliers. Guide retail prices are listed below:

Boat	Retail price \$ (ex. GST)
18' Skiff No1	\$895
18' Skiff No2	\$795
I14	\$541.5
